

GERVI PAULO C. CORADO

Healthcare Analytics & Data Engineering | Business Intelligence | Operations Strategy

09053367220 • gervicorado@yahoo.com • github.com/OrangeJuice023 • linkedin.com/in/gervi-paulo-corado • portfoliocorado.vercel.app

CAREER OBJECTIVE

Analytics and operations-focused student experienced in healthcare data systems, business intelligence, and process optimization. Proven track record of building production-grade analytics pipelines and executive dashboards for enterprise healthcare organizations. Combines deep data engineering skills with a strong foundation in industrial engineering and public administration principles.

PROFESSIONAL EXPERIENCE

Data Operations Lead | [Dashlabs.ai \(YC W21\)](#) | RemoteOct 2025 – Present

- Led the Data Analytics division at Dashlabs Data Studio, architecting and deploying 15+ client analytics platforms maintained across a team of 7 interns and analysts, with standardized ETL, dashboard deployment, and data-modeling protocols.
- Built end-to-end BI platforms for enterprise healthcare clients — Maxicare, Healthway, ARDI, AIC, NHS, One Health, PUDC, UPCare, RG Medical, Shalom, MedClub — analyzing facility-level granularity across all branches on datasets of ~500K–5M+ records per client.
- Delivered the company's first international deployment (Klinik Dr. Hondo Supeno, Indonesia), validating the analytics stack for cross-border rollout.
- Built real-time Looker Studio dashboards spanning operations, sales, finance, marketing, clinical snapshots, medicines dispensed, and patient LTV, automating recurring executive KPI reporting.
- Engineered healthcare data pipelines with automated cron-based refreshes (Kubernetes CronJobs), consolidating fragmented per-client logs (500K–5M rows) into centralized BigQuery analytics systems.
- Developed high-granularity Turnaround Time (TAT) dashboards for diagnostic workflows, surfacing bottlenecks and supporting SLA-compliance monitoring.
- Authored cohort analytics including a TB Diagnostic Cohort Analysis for The Primary by TDF (HTS → ART → viral-load 95-95-95 funnel) and APE reporting for AIC and ARDI.
- Designed SOPs and scoping/onboarding workflows bridging sales, operations, and analytics teams.
- Managed and mentored 7 data-science interns across concurrent client projects, enforcing data-quality standards and delivery timelines.
- Collaborated with institutional partners (Baguio General Hospital & Medical Center, Davao Doctors Hospital) to align analytics infrastructure with clinical reporting needs.
- Proactively pitched a social-media content strategy (TikTok/Reels edutainment formats using Dashlabs data visualizations) that was adopted into the marketing team's campaign pipeline.

Operations & Strategy Extern | [Amazon \(via Extern\)](#) | RemoteDec 2025 – Feb 2026

- Analyzed 100+ Glassdoor reviews and YouTube transcripts to evaluate operational challenges experienced by Amazon Fulfillment Associates.
- Developed a Python-based sentiment analysis pipeline using Pandas and TextBlob to process unstructured text data, identifying a 15% sentiment gap between social media narratives and professional review platforms.
- Identified three major attrition drivers — Physical Strain, Management Communication, and Scheduling Friction — using 5-Whys root cause analysis mapped to warehouse policies.
- Segmented employee cohorts by operational role and tenure to identify high-friction workforce segments and support targeted retention recommendations.
- Presented a pilot-ready intervention framework focused on improving associate experience and reducing operational risk.

Supply Chain Analyst Intern | [Aboitiz Foods](#) | PhilippinesJun 2025 – Aug 2025

- Built a real-time Production Order Quality dashboard in Google Looker Studio tracking ~19,000 production orders and 900M+ KG of material to monitor error trends and firming performance.
- Conducted Lean-based process reviews of warehouse operations at the Iligan Power Plant, identifying operational inefficiencies and high-risk bottlenecks.
- Developed a 10-year projection model for warehouse compliance and operational performance using trend analysis and 5S/GMP audit data.
- Designed interactive filters and custom KPI metrics to support executive-level operational reviews and production monitoring.

Finance and Accounting Intern | Etaily (TPA Operations Corp.) | Philippines *Mar 2026 – May 2026*

- Maintained vendor documentation compliance processes, ensuring completeness and accuracy of Official Receipts (ORs) using Volopay and Aspire.
- Monitored daily cash flow tracking systems to support financial reporting accuracy and operational planning.
- Supported month-end closing activities through journal entry processing and payment application workflows in Zoho.
- Assisted in Purchase Order (PO) migration to Oracle NetSuite, validating transactional data integrity during system transition.
- Tracked procurement workflows in ClickUp, monitoring approval pipelines and transaction statuses across operational teams.

Local Operations Officer | UP Engineering Student Council | Quezon City, PH *Jul 2024 – Jun 2025*

- Managed secretariat operations, document security, and logistical coordination for council venues and administrative paperwork.
- Oversaw office inventory and equipment rentals while driving team culture through structured recognition programs.

EDUCATION

Bachelor of Science in Industrial Engineering *2023 – Expected 2028*

University of the Philippines Diliman — Quezon City, Philippines

Relevant Coursework: Industrial Engineering, Economics (Macro & Micro), Public Administration, Operations Research, Health & Safety Management, Supply Chain Management

McKinsey & Company — Forward Program *Apr 2026 – Jun 2026*

Credential ID: 1938128E1

Invitation-only program focused on high-level business and leadership skills. Key skills developed: Structured Problem Solving, Adaptability, and Business Communication.

TECHNICAL SKILLS

Programming Languages

- TypeScript (primary)
- Python
- JavaScript
- HTML / CSS
- C
- C#

Data & Analytics

- Google BigQuery
- Looker Studio (Google Data Studio)
- Tableau
- Microsoft Excel
- SQL
- NLP & Sentiment Analysis

DevOps & Infrastructure

- Kubernetes (CronJobs / scheduled workloads)
- Lens (Kubernetes IDE)
- n8n (workflow automation)
- Cron-based pipeline scheduling

Frontend / Full Stack

- React / TypeScript

AI & Engineering

- RAG (LlamaIndex)

Supply Chain & IE

- Lean & 5S Methodology
- GMP Audits

- HTML / CSS (UI structuring & styling)
- Web3.py
- JavaScript (ES6+)
- OCR (Tesseract, PaddleOCR, EasyOCR)
- LLM Integration (Mistral, Phi-2)
- Prompt Engineering
- Workforce Segmentation
- Root Cause Analysis (5-Whys)
- Process Mapping
- SLA Monitoring
- Trend & Projection Modeling

Data Engineering & Pipelines

- ETL pipeline architecture
- Cohort analytics & funnel analysis
- Dashboard deployment & SOPs
- Data quality enforcement
- Automated KPI reporting

Tools & Platforms

- Google Cloud Platform (BigQuery, Looker Studio)
- Oracle NetSuite
- Zoho
- ClickUp
- Volopay / Aspire
- Pandas, Matplotlib, TextBlob, PyMuPDF, pdfplumber
